

LRS Enhances Printing for Cerner Millennium and Enterprise Apps

LRS Provides a Common Output Platform for Cerner Millennium and Other Business Critical Applications

Features to lower costs of Output Management from Cerner Millennium applications:

- Eliminate Millennium O/S Print queues on each Node, eliminating the requirement to build UNIX print queues
- Retain, reprint, redirect and divert print jobs without regenerating the output from the application level
- Assure delivery, even draw from specific trays, and provide email notification in the event of job failures
- Consolidate Millennium and other Open System applications output to a single output architecture for printing, viewing, archiving, faxing or email.
- Allow RHO clients to manage Cerner printers, and consolidate output from other Open Systems applications
- Eliminate conversion and down time during O/S changes, RHO conversions or application upgrades

Customer benefits:

- Consistent and accurate delivery of documents to the printers, email, faxing and archiving systems.
- Time savings to build print queues during print server or O/S changes from multiple man-years to man-days
- Increase Help Desk print issue resolution to over 90% on the first call
- Consolidation of print servers because they no longer have servers dedicated to each enterprise application
- Support Green Initiatives with hardware consolidation and control of printing through archiving

Levi, Ray & Shoup, Inc.

www.vpsx.com

Millennium Before LRS Solution

- Multiple O/S Queues
- Multiple printer definitions and points of failure
- RHOs are responsible for Device Viewer and must wait for O/S printer administration
- Adding, moving or changing printers requires hours/days and Unix administration

Millennium After LRS Solution

- Eliminate O/S Queues
- Printer definitions in Device Viewer and only VPSX
- RHOs can direct Millennium and enterprise applications output through VPSX and consolidate infrastructure
- Reduce downtime during O/S changes
- Printer moves and additions completed in minutes
