

VPSX/Workplace

Eliminate Windows Print Servers, simplify driver management

Simpler = Better

Purchasing, deploying, and supporting large numbers of Windows print servers is both time-consuming and expensive. One way to reduce IT cost and simplify your print infrastructure is by replacing Windows® print servers with a single Output Management solution.

VPSX/Workplace® software lets end users quickly find and add printers to their workstations using a self-service portal. Our seamless middleware platform handles all aspects of Windows printing and enables support for accounting as well as mobile and virtualized environments.

From any Desktop to any Destination

The innovative VPSX/Workplace solution captures output from physical and virtual Windows hosts and provides assured document delivery to any print device. Like other LRS® open systems solutions, it offers simplified print driver management/deployment/updates to ease the burden on IT staff. End users can quickly locate nearby devices and add new printer objects to Windows via an intuitive web-based portal interface. VPSX/Workplace software supports a hybrid print architecture that uses the robust LRS document spool, Direct IP printing, or both.

The answer is LRS Workplace Printing Software

LRS offers a simple yet powerful way to address your workplace printing challenges. The VPSX/Workplace solution helps you establish centralized management for all Windows printing that can:

- Print from any Windows desktop
- Quickly manage printer drivers, queues, and devices
- Solve print issues using an intuitive web interface
- Easily expand to support line-of-business applications and virtualized desktops.

AT A GLANCE

VPSX/Workplace

Provides enterprises with a hybrid print architecture that supports both spool-based and Direct IP printing methods to address the operational requirements of large organizations as well as small, remote office locations.

Handles all aspects of document capture, delivery, storage, and accounting to let you effectively manage output for centralized, distributed, mobile and/or virtualized environments.

VPSX/Workplace Software: Features & Benefits

FEATURES	BENEFITS
Centralized, scalable solution to replace many individual Windows Print Servers	Save money by eliminating redundant server hardware; manage more printers with fewer FTEs
Efficient single process/multi-threaded design; single system can drive 1000's of printers without CPU or memory constraints	Improved system stability and less downtime; frees up processing cycles for other applications and processes
Automated print driver management and deployment	Increased IT and user productivity
Web-based portal interface to enable user self-service (locate & define printers, etc.)	Fewer support calls; improve end-user productivity, mobility, and overall printing experience
Support for centralized, spool-based print management as well as Direct IP printing	Better network bandwidth optimization for maximum stability and system performance

LRS Printer Portal – simplified device location and configuration

The VPSX/Workplace solution includes the LRS Printer Portal. This intuitive, web-based interface makes it easy for users to locate and connect to nearby print devices while automatically provisioning the correct print driver.

Result? Improved user productivity, reduced help desk calls, and fewer printing failures.

The screenshot displays the LRS Printer Portal interface. At the top, there is a search bar with the placeholder text "Search on printer name, description, department or location". Below the search bar, the interface is divided into several sections:

- PRINTER FEATURES:** A list of features with radio buttons for selection, including "Colour", "Print on both sides", "Staple", "Secure Print Release", "PersonalQ", and "Mobile Print".
- LOCATION:** A list of locations with radio buttons for selection, including "All locations", "United Kingdom", "Gloucestershire", "Cheltenham", and "Technical Print Area".
- FLOOR PLAN:** A central area showing a floor plan of a building. A printer icon is highlighted, and a tooltip is displayed over it. The tooltip contains the following information:
 - P283**
 - Idle
 - Lexmark CX825 ESF6 UK technical
 - Buttons for "Add printer", "Print", "Lock", and "Settings".
- PRINTERS:** A section at the bottom left, currently empty.
- Page Information:** At the bottom right, it shows "1 -> 19 (19)" and a small color calibration icon.

VPSX/Workplace software simplifies complex Windows Print Server environments, establishing a centralized management system for all output

Integrated, feature-rich, highly extensible

The VPSX/Workplace product is based on the proven VPSX Enterprise™ solution, which manages documents from line-of-business applications as well as user desktops. Used alone or in conjunction with various extensions in the VPSX® product family, the solutions support:

- **Centralized print management** for both physical and virtual Windows desktops
- **Secure pull printing** that reduces wasted output by requiring users to authenticate identity before releasing documents for print. Integrates with LRS and third-party pull print solutions.
- **Mobile printing** from iOS®, Android®, and other devices
- **Print Tracking & Accounting** for improved security and cost control
- **Formatting and bundling** capabilities to enhance document appearance and usability

Scalable Standards-Based Architecture

Printers, applications, and computing hardware change over time. Your output management infrastructure should easily adapt to change, not create the need for more. That's why LRS software solutions are scalable and hardware-vendor agnostic, letting you adapt to these changes over time without impacting document-related business processes.

What does that mean for your business? Our solutions help you:

- Protect your existing investment in printers, platforms, and other infrastructure by building on industry-standard protocols and data formats instead of proprietary, vendor-specific technology
- Save money by supporting all major device types and vendors, letting you negotiate hardware contracts based on price and business terms rather than proprietary technologies

- Greatly expand the number of print devices and users in your network without additional print servers, thereby minimizing cost and IT burden

The ability to support large numbers of output devices from a single point of control improves the productivity of end users and IT staff. A recent study showed that users of LRS output management software experienced an average five-year ROI of 486% and a payback period measured in months, not years.

The LRS Enterprise Output Management Solution

VPSX/Workplace software works with the full LRS Enterprise Output Management solution; a robust, scalable platform that helps organizations reduce costs, increase efficiency, and improve service to internal & external stakeholders.

With more than 30 years of experience and over 5,500 installations worldwide, LRS maintains a singular focus on providing the world's most reliable and feature-rich output solution. For more information about LRS solutions, [click here](#) or contact your LRS account executive.
