

LRS® Output Management for HP® Customers

Any Platform
Any Application
Any Device

Multi Platform

- Capture output from any application (e.g. non-office/windows including SAP® and mainframe) in any configuration and deliver it to any device/destination
- Handles all language character sets including Unicode®
- Eliminate the need for special printer hardware

Short Term Document Retention

IT Operation Support

- Preview of document before print
- Retain "printed" documents enabling rerouting and reprint as required
- Diagnose and fix any issues through web interface

Document Storage & Viewing

View not Print?

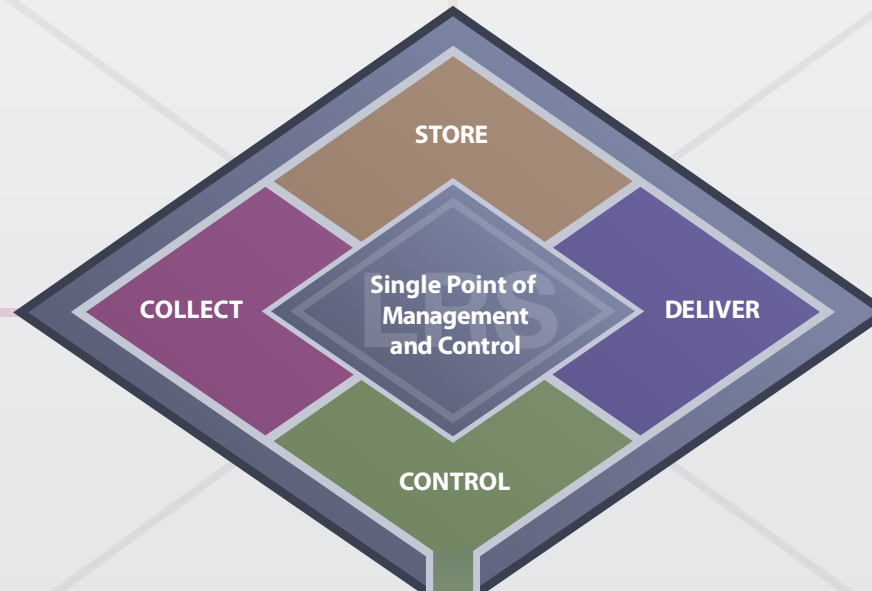

- Store any document or file type
- Retrieve quickly through indexed web search
- Secure storage with single sign on
- Stored in "as Printed" state

Multi Channel

Managed Output

- Ensure all documents are "delivered" with application notification
- Direct IP printing enabled as needed
- Printer locator and driver management with single install and rollout

Document Workflow Support

- Create rules based document workflow
- Enforce print policy e.g. colour, duplex, and reprints for certain documents
- Document bundling, splitting and decollation (e.g. downtime reporting)

Intelligent Document Processing

Transformation

Document Preparation

- Transform document formats, including PCL, PDF, PS, AFP, IFF, LCDS and OTF, etc.
- Document manipulation - overlays, watermarks, barcoding
- Interoperation with CCM/ Document composition tools (including HP Exstream)

Cost Visibility

- Audit all print usage by user, document etc. without the need for a pull print product
- Augment Job Accounting engines where required (e.g. HP Access Control Job Accounting)
- Provide online "consumption portal" for users to evaluate and change print behavior

Auditing and Reporting

Document Workflow Support

- Decrease security risks of document through authenticated release at printer
- Use cards, smartphones, pin codes, biometric scan to verify user ID
- Extend pull printing and secure release capabilities to include multi-platform output

Secure Delivery

Solutions Business Partner 

Integration with 3rd party solutions — Business applications, System monitoring tools, Pull Printing products, Enterprise Content Management, Job Scheduling tools, CCM/Document Composition etc.
