

The LRS Epic Integration for VPSX

LRS has more than 50 Epic customers and a decade of experience integrating with Epic customers. Through our engagements with some of the largest healthcare organizations, LRS has been able to dramatically improve print performance and reliability by continually refining our interface with Epic.

LRS works with the Epic print team as we have developed and refined our Epic interface solutions.

Benefits of the VPSX® for Epic® Solution:

- Provides a single point of control for all printers
- Is scalable with an unlimited number of printers
- Eliminates reliance on Windows® printer servers
- Provides one queue per printer
- Improves EPS and application performance
- Supports all open systems platforms that Epic runs on including UNIX, Linux, and Windows

- Provides a fully documented audit trail of who, when and where documents were viewed or printed to aid in HIPAA compliance
- Has the added capability to handle Windows printing and other enterprise application printing
- Reports job status back to Epic

Latest Enhancements for Epic for VPSX

The latest Epic interface for VPSX features many upgrades, is easier to use and maintain, and continues to help keep costs down. It has been tested with Epic 2014 and 2015 code to ensure compatibility. LRS tests any enhancements to our products with the newest code releases.

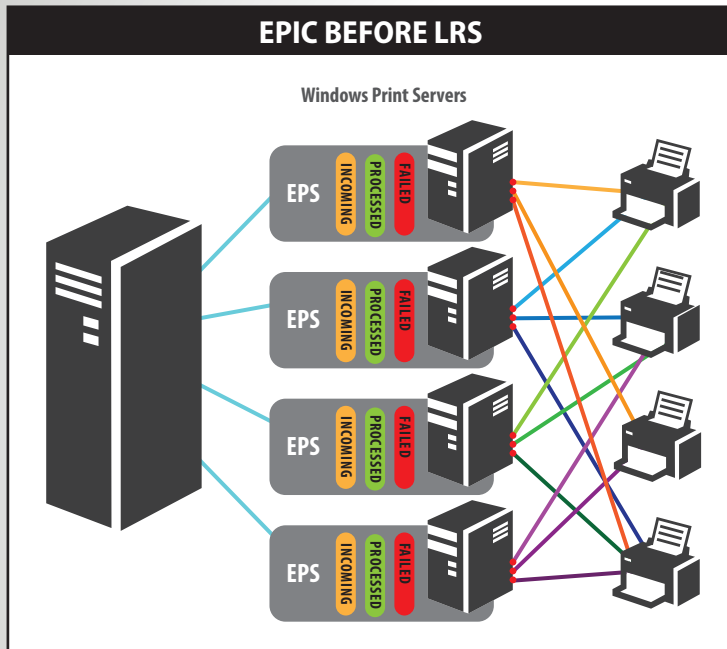

The Newest Enhancements to VPSX for Epic include:

- A simple, configurable process for VPSX to interface with Epic work flows
- Configuring is done with a GUI interface that simplifies the process

- Faster conversions with less memory utilization
- The VPSX/EI uses automated deployment to simplify adds and changes
- Customer environments are consistent which means support issues are simplified taking less time and manpower to address
- Unique customer requirements can now be accommodated within the VPSX/Epic Interface environment

The VPSX for Epic solution simplifies the management of document delivery to printers and other devices. It can provide secured web access to necessary information. It can also provide the ability to send documents to preferred documents and locations. It also provides electronic distribution of reports to ensure continuity during downtime events.

Physician's orders, patient wristbands, prescriptions and many other types of critical output are vital to delivering healthcare. LRS® VPSX for Epic EMR software helps ensure those documents are delivered quickly, correctly and where they are needed. VPSX for Epic provides reliable delivery of critical patient documents. Printing issues occur less frequently and are much easier to resolve.

EPIC BEFORE LRS

- Multiple Operating System queues
- Many printer definitions and possible points of failure
- Extensive OS printer administration
- Adding, moving or changing printers requires hours/days

EPIC AFTER LRS

- Consolidate EPS hardware
- Prevent problems with Windows printing
- Control and monitor all printing in central location, or distribute control by user group
- Administer both Epic and non-Epic queues on the same server
- Route output from Epic and enterprise applications to multiple devices, including mail servers and archiving solutions
